

## swat producing no data

Posted by Parra - 2010/05/31 15:56

---

Hi, Shea, sorry for my english, i work in Mayo River in Sonora Mexico, i tried everything suggested in previous discussion but I'm having the same problem (no data in swat results), the parameterization and precipitation files is correct, i use different csa% and use the data structure recommended, also i ran swat in cmd and i don't know what happens. Could you look my data and see if something's wrong? Thank you. <http://www.tucson.ars.ag.gov/agwa/images/fbfiles/files/SimSB.zip>

There were no files attached, can you try again. You can only attach images and ZIP files. You can edit a message to include an attachment after it has been posted, so if you don't get it right the first time you can try again without having to post a new message.

Shea

Thanks for your help, i resolved my problem. It was the file wgn, because the system could not find files. I made a new directory (mx) with the mexican parameters.

Thanks a lot
